

Table 1. System Performance Metrics (LOOCV).

A robust binary baseline combined with a high intervention rate for MCI cases confirms the system’s utility as a safety net.

Metric	Value	Clinical Significance
Binary Accuracy (NC/AD)	80.70%	Strong baseline for clear cases
Specificity (NC)	88.89%	High reliability in ruling out healthy subjects
MCI Intervention Rate	89.39%	Effective safety net for ambiguous cases
